

4 Stage Filtration

- PP Micron
- Coconut carbon
- Hollow Membrane
- UVC LED**

UVC LED
Touch Panel
Childhood Lock

\$ 300

5mm micron PP Polypropylene cotton filter

1. Filters sludge , rust, floating objects, macro particles.
2. Blocks large pollutants.
3. Helps reduce water pressure.

Coconut Carbon

1. Helps water molecules become smaller making it easier to penetrate the cell for the body to absorb it, thus improving the immune system.
2. Eliminates odor and fluoride in the water help the water become more alkaline.

HOLLOW FIBER MEMBRANE

1. Removes ultrafine particles, viruses, bacteria.(E Coll, Cholera bacteria, Dysentery bacteria ...etc).
2. Removes 99 % of bacteria

UVC LED 100% safe water

99.9%
Sterilize

UV-C killed most of Harmful pathogens, virus, germs during the purification process,
